The labor of nations cannot, by the wit of an, be so regulated as to prevent the pro-uction of surplusses which must perish, or nust be changed with other nations for the arplus productions which their labor creates, and as if to make the hand of Providence re visible in this matter, and to proclaim to mankind that they shall trade with each other, mingle together, exchange ideas as well as the products of their labor, and thus advance the products of their is or, and thus have been placed in different localities on the globe, with different climates, producing different products, all of which products minister to the comforts and luxuries of all nations, and are, therefore, desired by all.— Hence the exchange by one nation of the surplus products of its own labor, which it does not want, for the surplus products of another nation which it does not want.—

These different localities and climates also produce modifications of the person, the colour, and the mental constitutions of mental constitutions of mental constitutions of the person. also modifying their skill in the arts, and the productions of art. Hence one nation excels another in fanciful fabrics, while it is excelled by others in the more substantial, thus creating almost an infinite variety of manufactures, and generating the same ne-cessity or desire of exchange, trade and inof the world carried on-not upon the parrow, contracted and contemptible theories of tariff restrictionists, who would abolth all trade and intercourse between nations, and put an end to the progress of civiliza-tion, but in conformity with the laws of Providence itself, which counteract and deeat the selfish and mischievous purposes of ignorant or wicked men.

An Ingenious Suicide.—Sir William Hank-ford had been a well conducted man, but he was of a melancholy temperament, and he ecame tired of life, notwithstanding the high position which he occupied, and the respect in which he was held. He wished to 'shuf-fle off this mortal coil,' but he was afraid to commit suicide in any vulgar way, at the time when a verdict of felo de se always followed such an act, and the body of the supposed delinquent was buried in a cross road, with a stake thrust through it. He at last esorted to this novelexpedient, by which he toped not only that the forfeiture of his goods would be saved but the true of his goods would be saved, but that his family would escape the anguish and the shame arising from the belief that he had fallen by his own hand. Several of his deer having been stolen, he gave strict orders to his keepbeen stolen, he gave strict orders to his keeper to shoot any person he met within or near the park at night who would not stand when challenged. He then, in the dark night, threw himself in the keeper's way, and, refusing to stand when challenged; was shot dead on the spot.—Campbell's Chief Justice of England.

From St Louis.

The whole number of persons injured at the La Clede Soloon is 61. Some three or four will probably die. Mrs Beakey and Mrs Pomeroy were buried yesterday. A

large concourse of citizens attended.

Among the dangerously wounded are
Miss Abbott and Mrs Block, who it is
thought cannot recover. Miss Young and Miss Hopkins remain in a critical situation. Emanuel Black, reported killed, is thought to be out of danger now-Also Miss Block, expected to recover. Mrs Reed is seriously injured, but may recover, Some thirty are badly hurt, the rest slightly. The ause of the accident is now ascertained to be the giving way of the pillars of the ground floor; the second floor was supported by pillars from the ground floor.

Several robberies took place while the citizens were extracting the wounded.

How to MAKE WHITEWASH--As this is e season of the year for whitewashing, the Ohio Cultivator recommends the following receipt for making a whitewash, which is said (in the Horticulturalist) to be of the bestand most durable character :

Take a barrel and slack one bushel of freshly burned lime in it by covering the lime with boiling water.

After it is slacked, add cold water enough

to bring it to the consistency of good whitewash. Then disolve in water, and add one pound of white vitriol (sulphate of zinc) and one quart of fine salt. To give this wash a cream color add one-

half a pound of yellow ochre in powder. To give it a fawn color, add a pound of yellow ochre, and one-fourth of Indian red. To make the wash a handsome grey stone

color, add one-half a pound of French blue and one-fourth of a pound of Indian red, will be made by adding one-half pound of sienna, and one-fourth pound of Venitian red.

For Brick or stone, instead of one bushel of lime, take a half bushel of hydaulic ce-

FEARFUL MORTALITY AT BAHLA .- The brig Boston, from Bahia the 10th instant, arrived at Boston, announces that the vellow fever had been raging terrib'y at -sweeping of seamen belonging to vessels in port, and great numbers of the slaves. A Government Report make the total mortality in the Province, 8000 .-Previous to the sailing of the Boston, there had been a severe thunder storm, which had cleared the atmosphere and caused the disease to abate. It was thought that it would be totally extinct in a few days.

Mrs. Partington is glad to hear they find ald in quartz, in California, has no doubt it will soon appear in gallons, and says when they find it by hogsheads she intends to go herself to the horriferous region.

Mrs. Ann S. STEPHENS, well known as a writer for the Magazines, sailed in the Hermann on Saturday, for a tour in Europe, in company with the son and daughter of the Hon. Zadoc Pratt.

bout which there has been so much surmine, advence, is at last announced, on the last of the Astor Place Opera House, as may for rebeared. It will probably, be put the stage next week. It is entitled "The last way way."

From Havana

The steamer Ohio arrived at New York a few days since from Havana. The news brought by this arrival is rather interesting,

The Ohio brings \$120,000 in specie and gold dust, \$75,000 of which are for Wm. Hoge & Co., of N. Y. City, and the remain-der being nearly all for the mint at Philadel-

Four steam, and three sailing frigates, having on board General Mirasol and staff, consisting of one Admiral of the Spanish navy, General Amat of Engineers, and several other officers of rank of the Spanish army and navy, accompanied by four thousand veteran troops to augment the military force of the Island, are hourly expected at Havana.

There are various conjectures as to the ob-ject of this move on the part of the government at home, but it is pretty well under-stood that it is for the purpose of negotiating with the President of the United States, for the sale of the Island or for protecting it against invaders.

A disease supposed to be cholera, at Havana, being confined solely to the military hospitals, was believed by many to be only typhus fever, while others think that it is cholera, and some that the troops had been poisoned. As we understand it this is a second outbreak, and not the one of which we have previously had intelligence.

Government had taken the precaution of sending all the troops from the barracks, sup-posed to be unhealthy, to the sugar estates in the country,-Balt. Sun.

From Jamacia. Kingston papers of the 10th have the fol-

lowing items : It appears that on Saturday last the sloop Caroline left Morant Bay for Kingston. with

a large number of passengers, among whom were Mr. and Mrs. Duffus and four children, of St. Thomas in the east; Miss Cooper daughter of Deiderick Cooper, Esq., of St. Andrew; Misses Kirkland, and several other ladies and gentlemen. The sloop, before leaving the harbor got on a reef, and became a wreck. The passengers were then got in-to a boat, which pulled for the shore, but before they could reach it a heavy sea cap-sized it, and—pained, are we to record the melancholy circumstance—seven persons, including Mrs. Duffus and her four children Miss Cooper, and one of the Misses Kirkland met a watery grave. Mr. Duffus, and several gentlemen who were passengers, and were on their passage to this city to serve as jurors in the present assizes, were happily

A New Idea.

The United States Life Insurance Company have conceived the novel project of uniting the conveniences of Banks for Savings and of insurance upon lives. According to their system, insurances are payable to the persons taking out policies on their attaining certain ages, and not as in other companies, only upon the decease of the insured party. For example, a person 24 years of age, paying \$51,50 annually, secures \$1,000 for his family if he should die immediately after effecting the insurance; but if he lives to the age of 40 years, he receives that amount himself. with his share of the profits of all the businces transacted by the company during the whole period in which he has been insuring. At 31 years of age, paying \$46,20 annually, secures equal benefits, of the same amount, on or before attain age of 50. Beginning at the age of 40, a payment of \$45,70 per annum, secures the same on or before attaining the age of 60; and a youth 18 years of age, may obtain the same advantages, at or before the age of 60, by the payment of \$18,20 per annum.

We have cited these cases to show the practical operation of this new system of life insurance. The principle is a judicious combination of the Savings Bank and the Life Insurance Company, affording immediate protection to the family or dependents, in the amount insured, and securing to the insurer, if he lives, the full advantages of an investment of money at interest. It secures from small savings, the means of establishing a business, or of producing a homestead at periods of life when the accomplishment of either of these objects frequently become an absorbing topic of domestic solicitude .- N. Y. Evening Post.

State of Germany.

The Washington correspondent ("X.") of the Baltimore Sun, than whom no man in America understands better German affairs, thus speaks of late private advices from the continent of Europe :

The news which has reached here by private letters, from the continent of Europe, is exceedingly interesting, though the papers contain but little worth noticing. Germany is most unquestionably on the eve of a general revolution and bankruptcy. The revolutionary spirit has been quieted for a moment, but at such a sacrifice of blood and treasure that the conquest of monarchy is left without the means of maintaining its advantages. Forced loans are resorted to in the smaller States of Germany, which induces the holders of public bonds to exchange them for English or American securities. The high quotations of British Consols are the consequence of large purchases on the conti-nent, and the high price of American securities in Lordon is accounted for in the same manner,-In case of an European war. American 6's would no doubt fly up to 25 or 30; as, in this case, even British Consols to exchanged for certificates of

American loans. The new elections in Wurtumburg, with Austrian troops on the frontier, turned out as follows: Democrats, 49; in favor of the King of Prussin, 1; courtiers inclined in favor of Austria, 6. Democrats to Monarchists as 7 to 1. The political problem in Europe, as condensed in a single question, is this: How long will the maximum of revenue that can be raised under the present system, suffice to support the smallest standing army necessary to keep the opposition in check? The question will soon receive its historical resolution. "Nothing so short lived," said Edward Borke, "as a military despotism."

Care Several persons in the Presbyterian Church at Pennington, N. J., became unexpectedly sick, on Sunday last, and were obliged to leave the house, and several fainted, owing to the house being filled with carbonic acid gas, from charcoal in the furnace.

WHERLING AND PETTHBURGH.—The per ple of Wellsburg, Va. are agitating the question of a railroad from Whoeling to

The number of Sunday school teachers in England is estimated at 250,000, about 200,000 of whom are from the laboring classes; the number of scholars is estimated at 3,000,000. In this country there is probably a total of about 500,000 teachers and 3,000,000 scholars.

PASTE THAT IS PASTE .-- I issolve an ounce of alum in a quart of warm water; when cold add as much flour as will make it the consistence of cream; then strew into it as much powdered rosin as will stand on a shilling and two or three cloves; boil it to a consistence, stirring all the time. It will keep for twelve months, and when dry may be softened with water.

SELLING LIQUOR TO SLAVES .- Last Janu ry a slave belonging to a widow lady in Platte county, Mo., bought a quart of whiskey at a store, got drunk, fell from his horse and froze to death. The lady sued the firm, and at the March term of the Plattee court obtained a verdict for \$850, the value of her negro.

Mr. O'Reilly announces in the St. Louis Republican, a project of telegraph line from that city to San Francisco. He proposes that the Government shall establish a tine of stock-des at suitable distuuces all along the route, which shall serve as telegraph stations, and at the same time afford protection to emigrants to California, and facilitate the transmission of the mail.-Beyond this, he asks no aid from the Government.

Sr. Louis, May 4th .- The steamer Missouri buried twelve passengers on her trip up, who d'ed of Cholera. Sever l have died since the boat landed. Steamer Corn reported sunk at Council Bluffs, and 15 passengers drowned.

moral worth and professional acquirements, will compare favorably with the most distinguished in our country.—The Medical Faculty constitutes an anomaly in this or any other country—all of them are able lecturers and the best of teachers. Those who will contemplate our geographi-

cal position and the extent of our population, can have no doubt as to the eligibility of our situation for an enterprise of the kind. As to health, including all seasons of the year, we deny that ANY OTHER CITY HAS MORE.

deny that ANY OTHER CITY HAS MORE.

A common error exists in the minds of many students relative to the place of studying medicine: those who intend practicing among the diseases of the west and south should certainly educate themselves at a school whose Faculty are practically acquainted with these diseases.

That the public may be satisfied of the permanency of this school, we teel it our duty to state, that the Trustees and Faculty form a state, that the Trustees and Faculty form a unit in action, which augurs well for its fature success, and that the peculiar internal organization which connects them, cannot be intertupted.

Is hereb, given that an election by the Stock-holders of the Portsmouth Insurance Company will be held at the office of said Company, between the hours of 10 A. M. and 2 o'clock P. M., on Manday the 6th of May next, to the company of the said Com

LET EVENUED THESE THIS CARPULEY.—There is a Sarasparille for sale in she different towns called S. P. Townsend's Strasparilla. It is advertised as the ORIGINAL, GENUINE, and all man. This Townsend is no foctor and never was; but was formerly a worker or rathroads, canals, and the like—yet he assumes the tille of Doctor for the purpose of gaining crolic for what he is not. He says "he has attended two medical schools, and practiced for fixen years!" Now the truth is, he never practiced for fixen looks but to the character said verseity of the man. I wish mass singersely, he had never made there exactened to the character said verseity of the man. I wish mass singersely, he had never made there exactened of himself or of me. When will men learn to be honest and fruthful in all their dealings and insertences with their follow men! He applied to one Rue Clapp to assess him in manufacturing his sticture, stating the large ways he would make, as an inducement to embark in the business. These men have been insulting and liberling ms in all possible forms, in order to impress the pubble with the belief, that the Old Doctor's Sarsaparilla was not the genuine, original Sorsaparilla, made from the Old Doctor's fixed from the Old Doctor's fixed from the Old Doctor's ingle of the property of the said property. This S. P. Townsend says I have sold the use of my name for \$1 x week. I will give him \$200 Jif he will produce one single relifary proof of this. His statements of Thompson, Skillman & Co., are nothing but a tissue of Gaisehoods, simply made to decive the public, and keep the tenth down in regard to his souries, fermenting compound. This is to caution the public, to purchase none but Old Dr. JACOB Townsend's Sarsaparilla, having on it the Old Boctor's likeness, his family Cost of Arms, and his agnatureactors the Cost of Arms.

Principal Ofice, 102 Nassau street, N. Y. City.

Old Dr. Jacob Townsend, THE ORIGINAL DISCOVERER OF THE Genuine Townsend Sarsaparilla. Old Dr. Townsend is now about 70 years of age, and has long been known as the AUTHOE and DISCOVERER of the GENUINE ORIGINAL "TOWNSEND SARSAPARILLA." Being paor, he was compelled to limit us manuscture, by which means it has been kep out of market, and the sales circumscribed to those only who had proved its worth, and known its value. It had reached the ears of many, nevertheless, as those persons who had been healed of sore diseases, and saved from death, proclaimed its woutherly.

HEALING POWER. HEALING POWER.

This GRAND AND UNEQUALLED PREPARATION: manufactured on the largest scale, and is called for throughout the length and breadth of the land, especially as it is found menable of egesilicition or deterioration.

Unlike young S. P. Townsend's, it improves with age, and never changes but for the better; because it is prepared on scientific principles by a scientific men. The highest knowledge of Chemistry, and the latest discoveries of the art, have all been brought into requisition in the manufacture of the Old Dr's Sarsaparilla. The Sarsaparilla root its well known to medical men, contains many medicinal properties, and some properties which are inject or useless, and others, which if retained in preparing it for use, produce fermentation and oxid, which is injurious to the system. Some of the properties of Sarsaparilla are so telefish that they cuttrels waporate and are lost in the preparation, if they are not preserved by a scientific process, known only to those experienced in its manufacture. Moreover, these valuation, under heat, are the very examinal medical properties of the root, which give to it all its value.

Any person can boil or stew the root till they get a dart colored liquid, which is more from, the coloring matter in the root than from anything else; they can then strain this intipid or vapid liquid, sweeten with nour molesses, and then call it "SARSAPARILLA EXTRACT or SYRUP" flut such is not the article known as the GENUINE OLD DR JACOB TOWNSEND'S SARSAPARILLA.

This is no prepared that all the intert properties of the Sarsaparilia good are first removed, everything canable of THE GRAND AND UNEQUALLED PREPARATION

SARSAPARILLA.

This is so prepared that all the inert properties of the Sarasjarriis root are first removed, verything capable of becoming acid or fermentation is extracted and rejected, then every pariole of medical virtue is secured in a pure and concentrated form; and thus it is rendered incapable of losing any of its valuable and healing properties. Prepared in this way, it is made the most powerful agent in the Cure of Innumerable Diseases.

Hence the reason why we hear commendations on every side in its favor by men, women, and children. We find it doing wonders in the cure of CONSUMPTION, DYSPEPSIA, and LIVER-COMPLINT, and in RHEUMATISM, SCROFULA, PILES, COSTIVENESS, all CUTANE, OUS ERUPTIONS, PIMPLES, BLOTCHES and all affections arising from

and all affections arising from
IMPURITY OF THE BLOOD.

1 presence a marvellous efficacy in all complaints and one from Indigestion, from scidity of the Stomach, from menual circulation, determination of blood to the head palpitation of the heart, cold feet and hands, cold chills and not flashes over-the body. It has not its equal in Colds and Complex; and promotes easy expectoration and gentle perspiration, relaxing strictures of the lungs, throst and every her part. Hut in nothing is its excellence more manifestly seen and acknowledged than in all kinds and stages of FEMALE COMPLAINTS.

acknowledged than in all kinds and stages of FEMALE COMPLAINTS.

It works wonders in cases of Fluor Albus or Whites, Fulling of the Wonth, Obstructed, Suppressed, or Fainful Menres, Irregularity of the menutal periods, and the like and is effectual in curing all the forms of Kidsey Discuses.

By removing obstructions, and regulating the general system, it gives tone and strength to the whole body, and thus cures all furns of New Yorks Discuses and Debility, and thus thereins or tellewis a great variety of other maladies, as Spiral tritation, Neuralgia, St. Vitus' Danes. Suscourag. Epileptic Fits, Convulsions, &c.

It cleanese the blood, excites the liver to healthy action, tours the somach, and gives good digestion, relieves the bowels of tortor and constituation, allays inflammation, purifies the skin, smalites the circulation of the blood, producing centre excitations and invigates the earth party of the more all abstructions and invigates the earth party of the more stages. It is not that then The Medicine you present intensity need?

The Medicine you presentinently need?

But can any of these things be said of S. P. Townsend's inferior article? This young man's figurid in not to be COMPARED WITH THE OLD DR'S, because of one GRAND FACT, that the one is INCAPABLE of DETERIORATION, and

BLE of DETERIORATION, and

MEVER SPOILS.

while the other DOES: souring, fermenting, and blowing
the boilies containing it into fragments; the sour, acid
ifiguid exploding, and damaging other goods! Must bot this
horrible compound be poisonous to the system!— What
put acid into a system already discused with acid? What
causes Dyspepara but acid? Do we not all know that when
lood sourcem our stumachs, what unschief it produces !fainisence, posentium, palpitation of the heart, liver complaint, diarrhous, dysentery, colle, and corruption of the
blood? What is Scrottal but an acid humor in the body?
What produces all the humors which bring on Ecuptions of
the Skin, Scall Head, Sall Rheum, Erysipelas, White
Swellings, Feyer Sores, and all ulcerations mermal and external? It is nothing under heaven but an acid substance,
which sours, and thus spoils all the fluids of the body, morary less. What causes Rheumatism but a sour and acid
field which is juitates itself between the joints and eise
where, irritating and inflaming the delicate tissues upon
which it acis? So of nervous diseases, of impurity of the
blood, of deranged circulation, and nearly all the aliments
which afflict human nature.

Now is it not horrible to make and sell, and enfinitely
storse to use this.

SOURING, FERMENTING, ACID * COMPOUND* OF
S. P. TOWNSEND,
and yet he would fain have it understood that Old Dr. Jacob Townsend's Greunes Original Sarasparilla, is an iMITATION of his inferior preparation.!!

Heaven forbid that we should deal in an article which
would bear the most distant resemblance to S. P. Townsend's article!

We wish it understood, because If is the absolute truth,
that S. P. Townsend's article and old Dr. Jacob Townsend's
Sarasparilla are hearen-seted apart, and infinitely dissimidar; that they are unlike in every particular, having not
ene single thing its common.

As S. P. Townsend is a no doctor, and never was, is no

iter; that they are unlike in every particular, having not one single thing in common.

As S. P. Townsend is no doctor, and never was, is no chemist, no pharmaceutist—knows no more of medicine of discase than any other common, inscientific, unprefessional man, what guarantee can the public have that they are receiving a groutus scientific medicine, containing all the virtues of the articles used in preparing it, and which are incapable of changes which might render them the AGENTS of Bisease instead of health?

But what else should be expected from one who knows softing comparatively of medicine or disease! It requires a person of some experience to cook and serve up even a common decent meal. How much more unsportant is it that the persons who manufacture medicine designed for WEAK STOMACHS AND ENFERBLED SYSTEMS, should know well the specical properties of plants, the best

should know well the medical properties of plants, the best manner of securing and concentrating their healing virtues, also an extensive knowledge of the various diseases which affect the human system, and how to adapt remedies to

and the numan system, and now to acapt tendence the sees diseases?

It is to arrest frauds upon the unfortunate, to pour balm into wounded humanity, to kindle hope in the despairing bostom, to restore health, and bloom, and vigor into the crushed and broken, and to boatis informity that OLD DR. JACOB TOWNSEND has SOUGHT and FOUND the op-

pertunity and means to bring his Grand Universal Concentrated Remedy within the reach, and to the knowledge of all who need it that they may lear and know, by joyful experience, the Transcendant Puwer to Heat.

Inflammatory Rheumatism. THE AMERICAN RHEUMATIC BALBAM!! A New Remedy Lately Discovered

N the vegetable kingdom—a sure and perma nent cure for all Rheumatic Complaints, Inflammatory, Chronic, Acute and Mercurial Rheumatism, Gout, Lumbago, Spinal Affec-

tions, etc., etc. This medicine has long been sought for. It has been said that Rheumatsan could not be cured; but there is a remedy designed by nature for the cure of every disease that the hu-men system is subject to. At last a remedy has been found that cures Rheumatism of the worst form-one of the most valuable vegetable pro-ductions of the earth-the greatest and most important discovery of the sgc and a wonderful blessing to the human family. It cures without sickening or debilitating, and renews strength and vigor to the whole system. It has cured, during the past three months, over 500 cases that were considered incurable.

Certificates of the curative properties of this medicine can be seen by calling on the Agents. LT None genuine unless put up with an engraved label upon the outside wrapper, signed by the proprietor, R. TURNER, Buffalo, N. Y. G. F. Thomas, wholesale and retail Agent,

Portable Galvanic Batteries Of the Latest Improvements with Direc-

HESE machines are so constructed, that the operator may at pleasure produce an intense current, and instantaneously change it to a perfectly soft current, pervading the whole system or the part affected only, at the pleasure of the patient. They are the most energetic and simple in their structure, and in point of convenience excel any others. April 17, 1849 nº J. L. M'VEY & Co.

Notice to Creditors. NOTIGE is hereby given to all persons in-

terested that at my instance a writ of attachment was this day issued by Cornelius McCoy, a Justice of the Peace of Wayne township, in the county of Scioto, against the goods, chattels, rights, credits, moneys and effects of Alonzo Chandler, a non-resident of the county of Scioto. ARTHUR C. DAVIS.
